It is recommended to mount the article by 2 adults. Please wear gloves when assembling the unit to prevent injury. If necessary, other measures will be still needed for the sake of safety.

Not intended for children use. It is forbidden to allow children to climb or play on the product to avoid serious body injury caused by the tilt.

Keep the product away from fire sources.

The item should be placed against and fixed to the wall. Please only use wall plugs and retaining screws that are suitable for your type of wall. Please consult the local dealers and get some advice.

Do not place the product in a highly humid environment (such as a bathroom or laundry room) to prevent mold and mildew.

Please use this product in a well-ventilated and dry environment. It is recommended to maintain the humidity level between 30% and 40%.

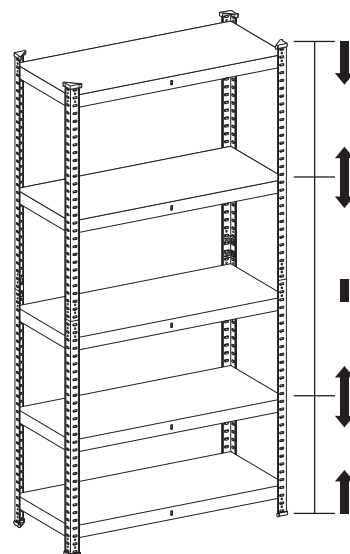

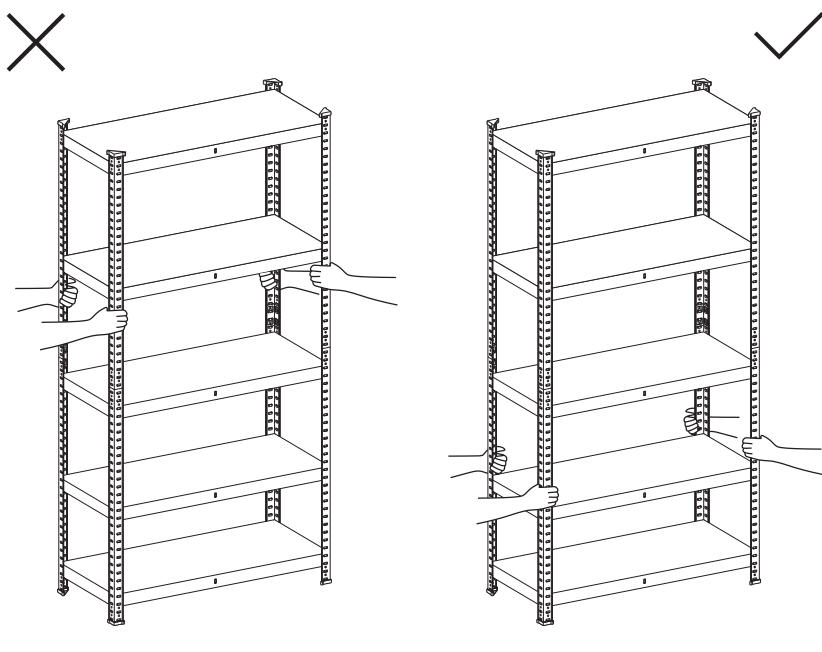

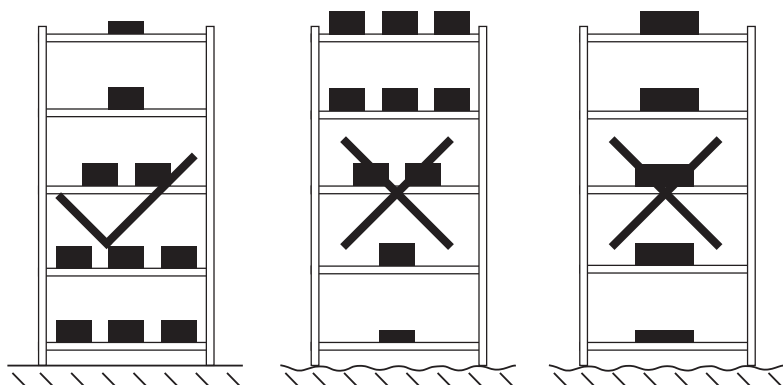

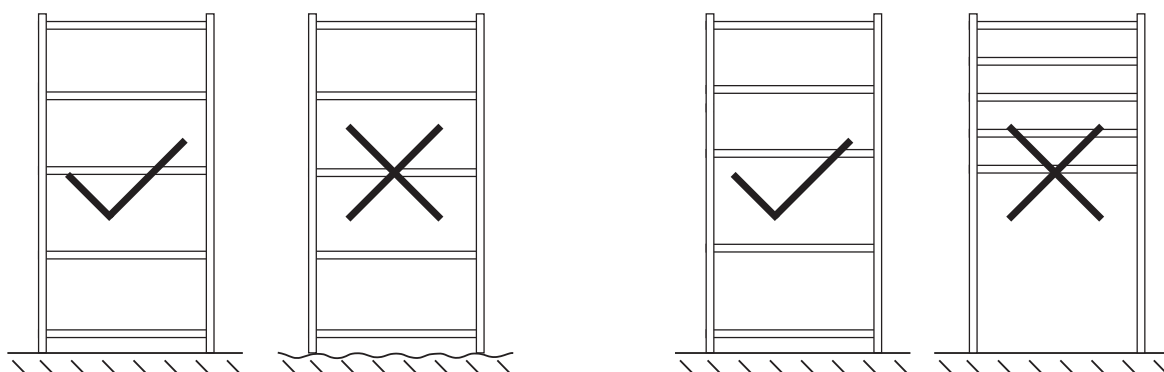

Wet or damp items (such as wet shoes) may cause mold on the shelves. Before placing any item on the shelves, check the bottom for moisture and wipe it dry or place a waterproof mat underneath if wet.

Trimming corners on panels is part of the normal manufacturing process, not a quality defect.

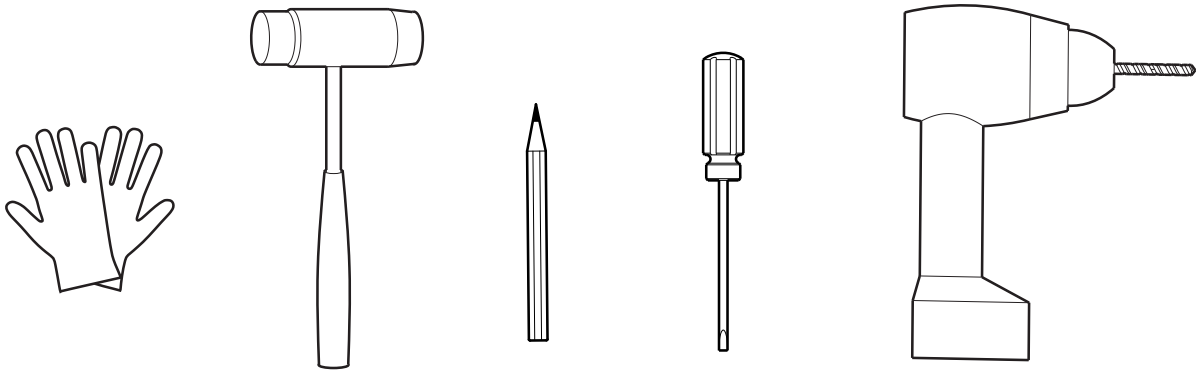

For your safety, do not stack too high on the top shelf.

The load on the shelves must be evenly distributed so that no harm can come to the wooden boards. Never exceed the maximum shelf load or the maximum load for the complete unit array.

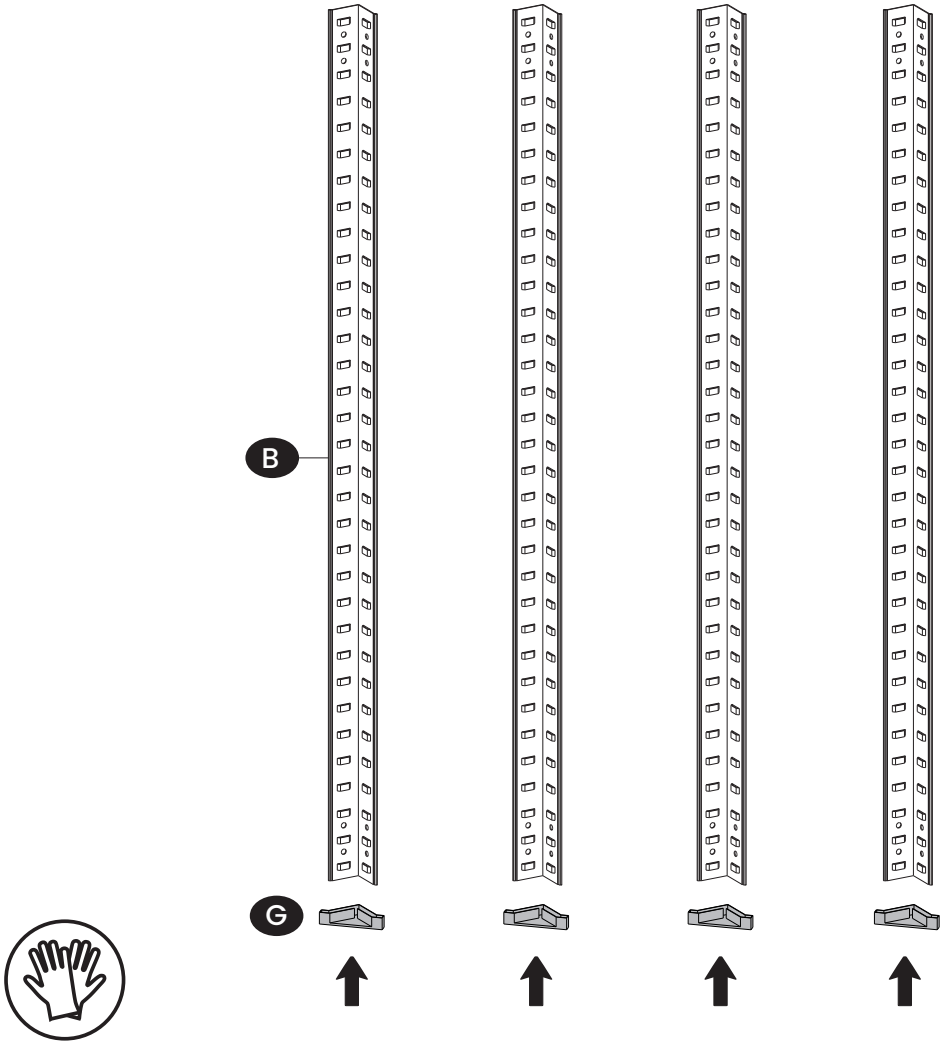

It is recommended to use gloves, a rubber hammer as well as a flat head screwdriver during assembly, which should be provided by yourself.

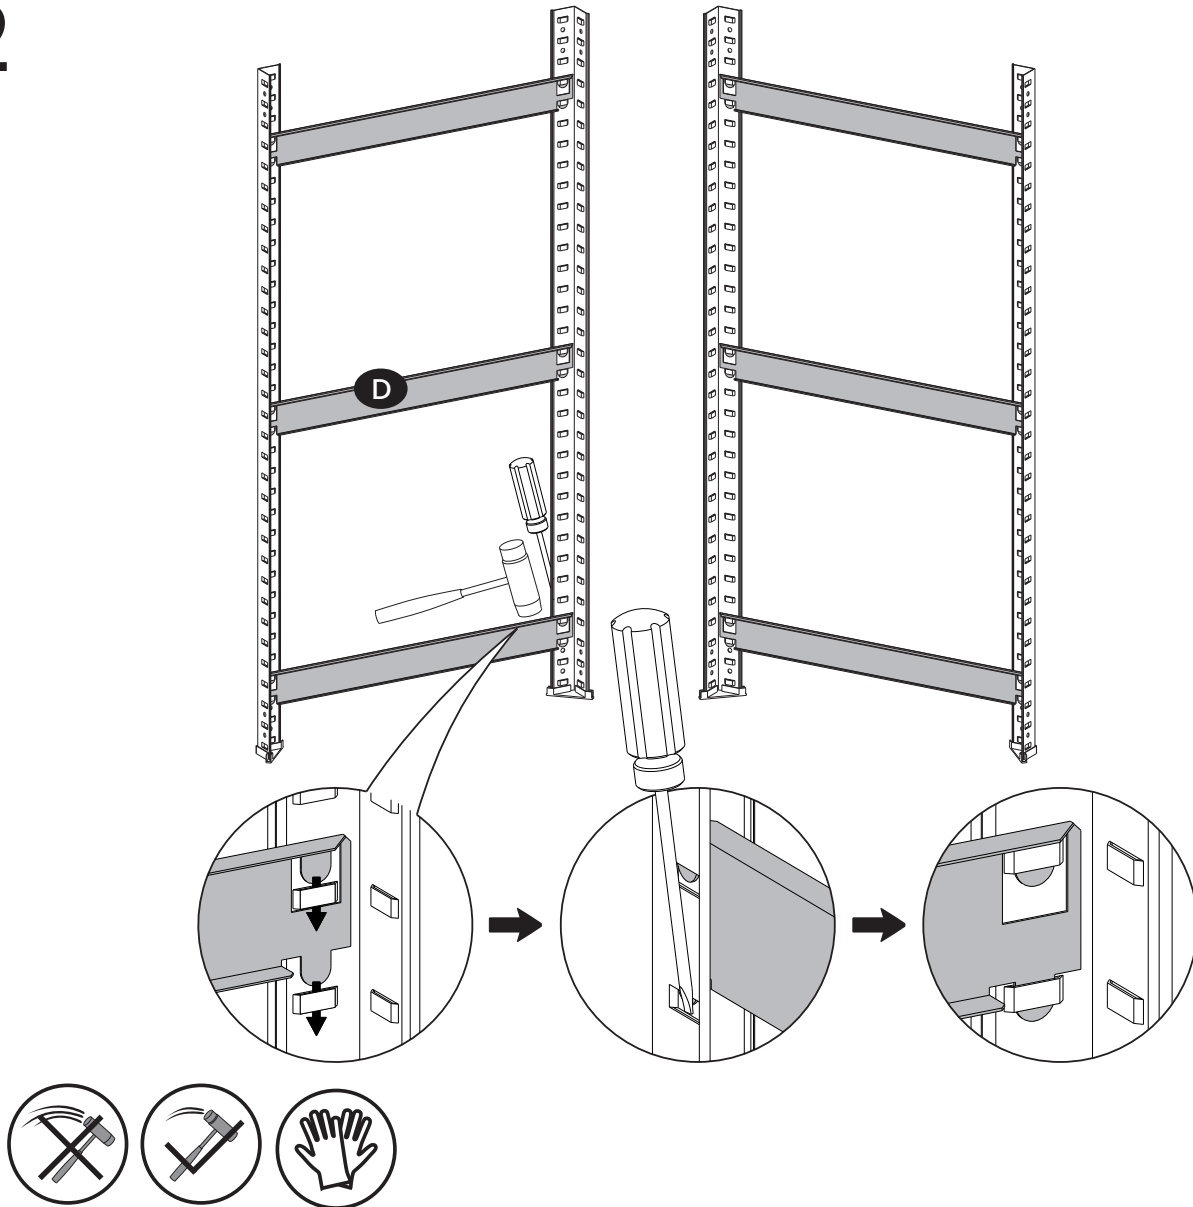

Tools required:

1

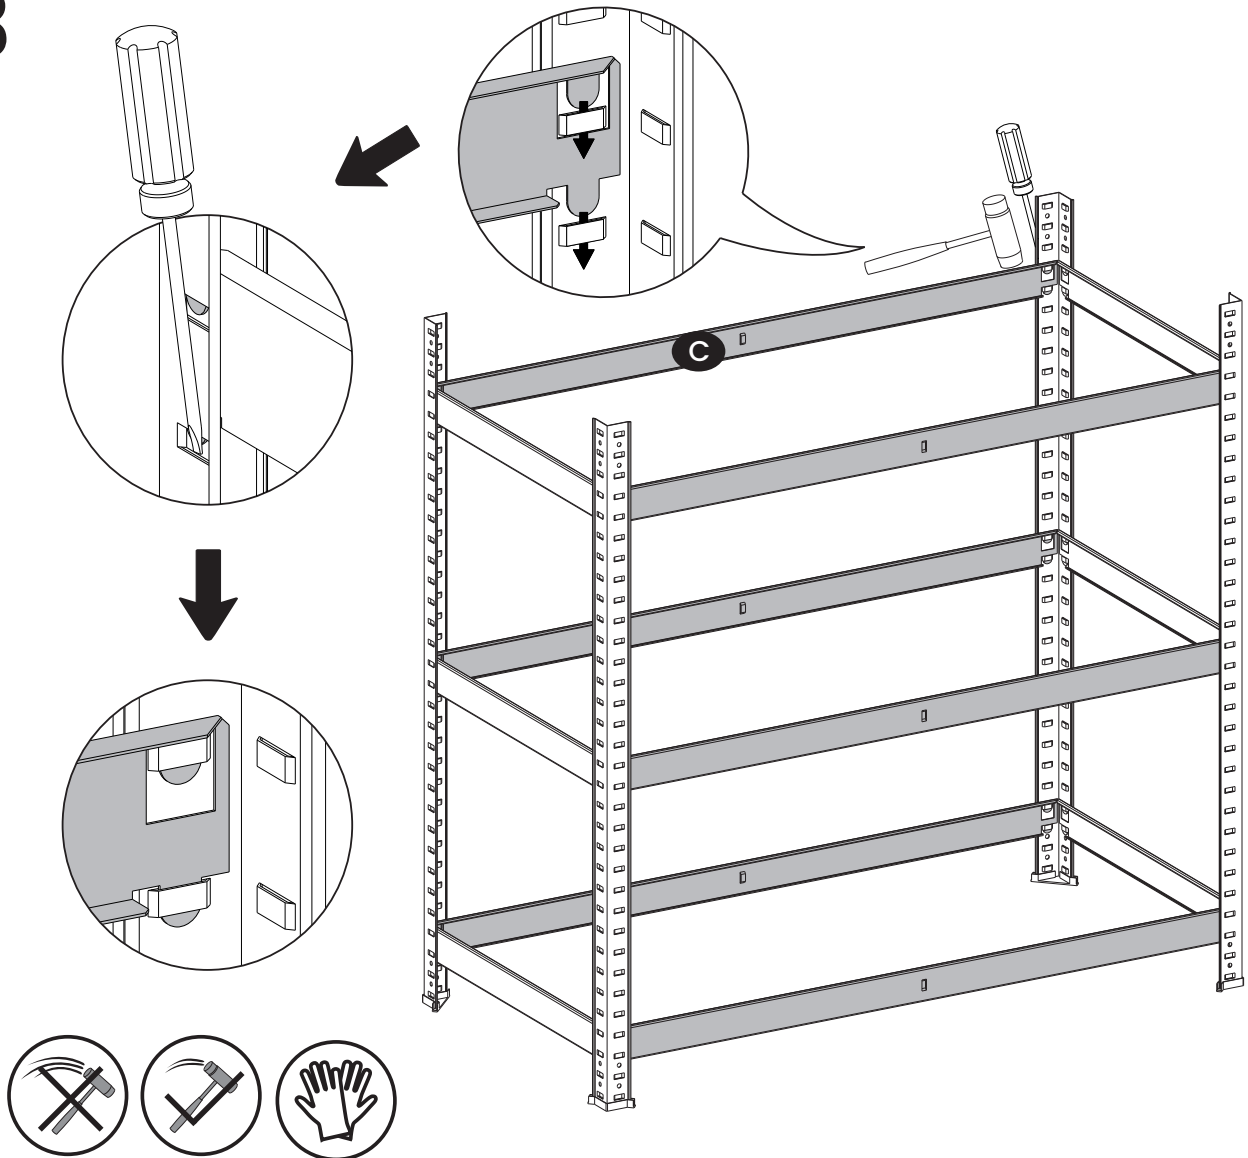

2

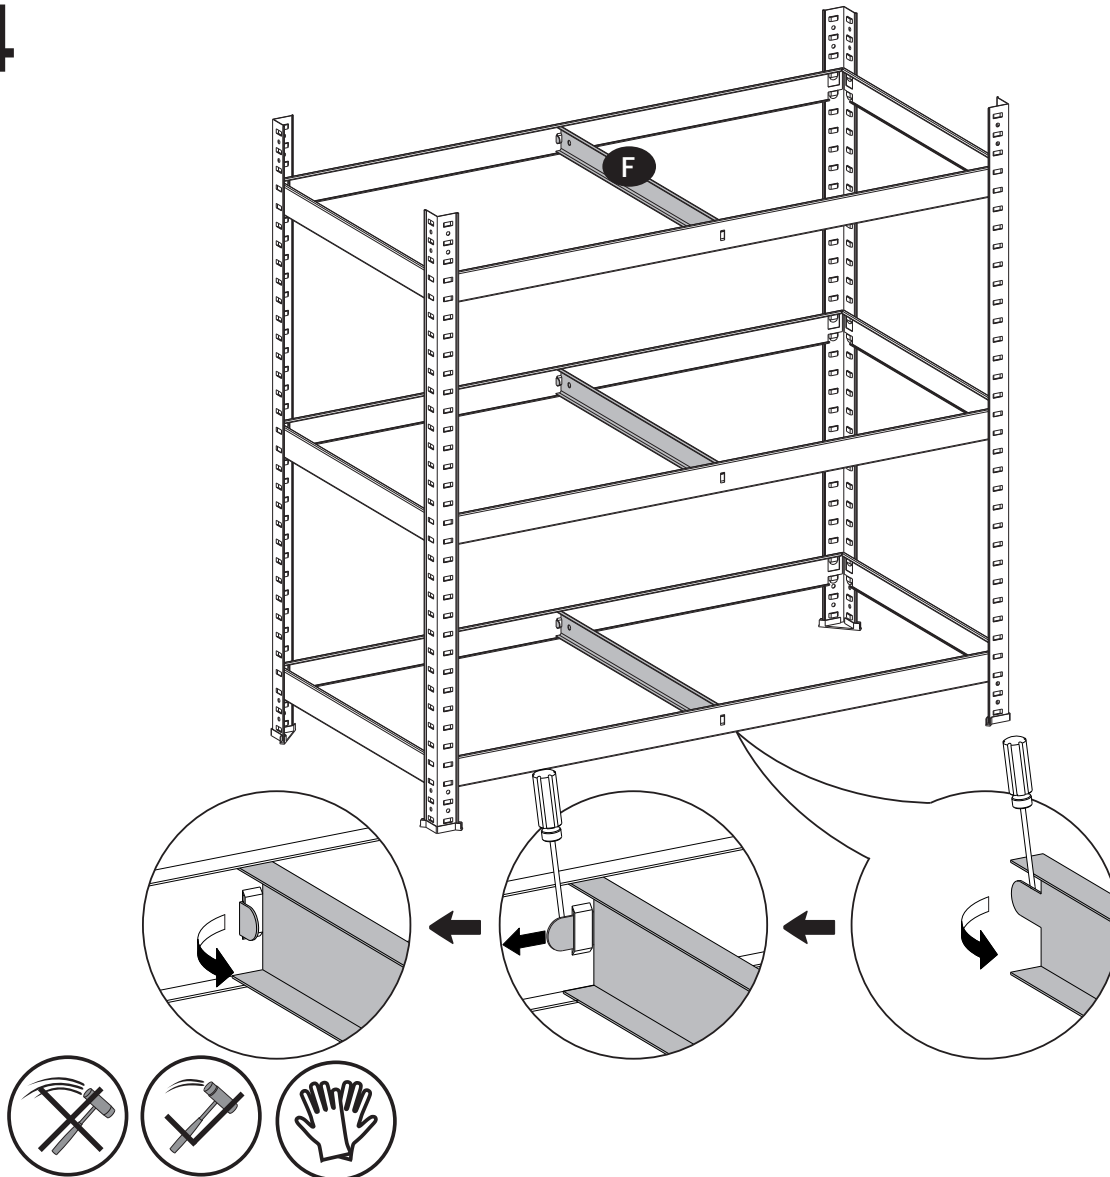

Insert both of the part D clips into the two slots of part B and make sure both of the clips pass entirely through the slot with its tip coming back out to the front to form a firm joint.

3

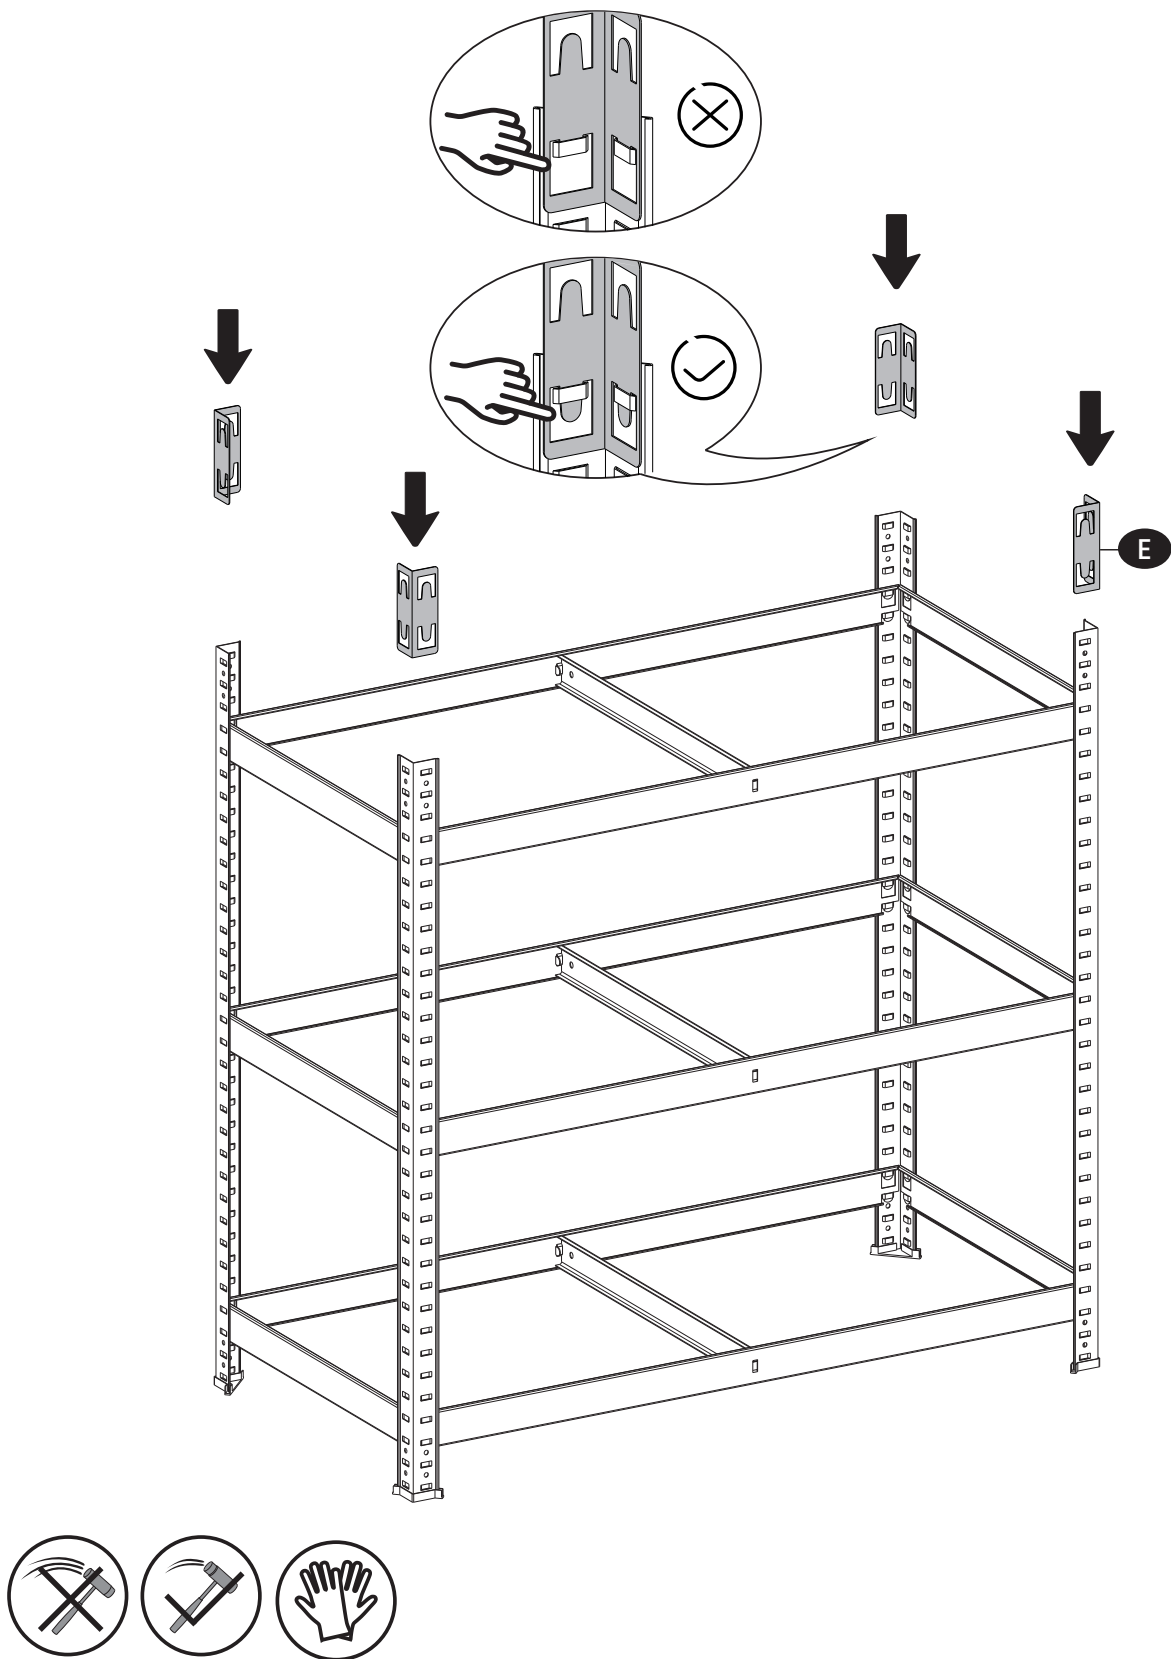

Insert both of the part C clips into the two slots of part B and make sure both of the clips pass entirely through the slot with its tip coming back out to the front to form a firm joint.

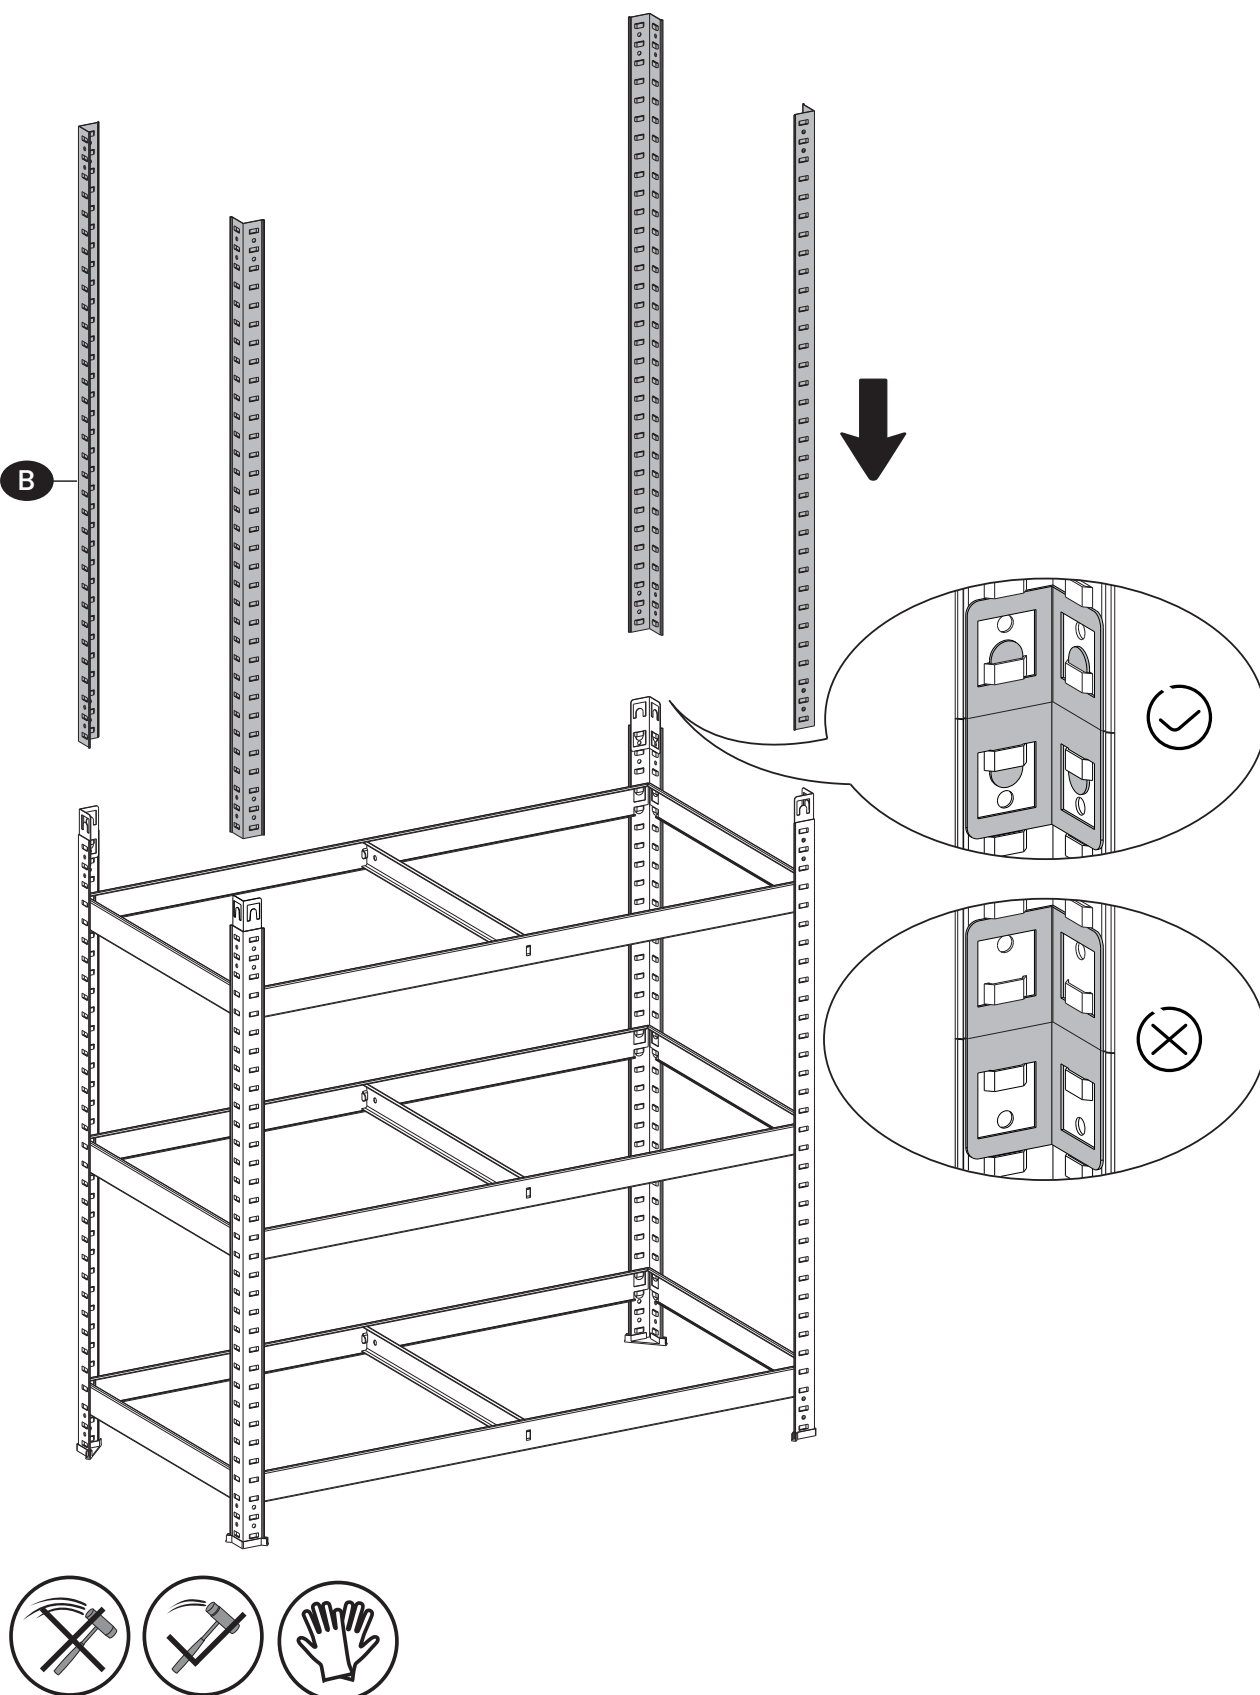

4

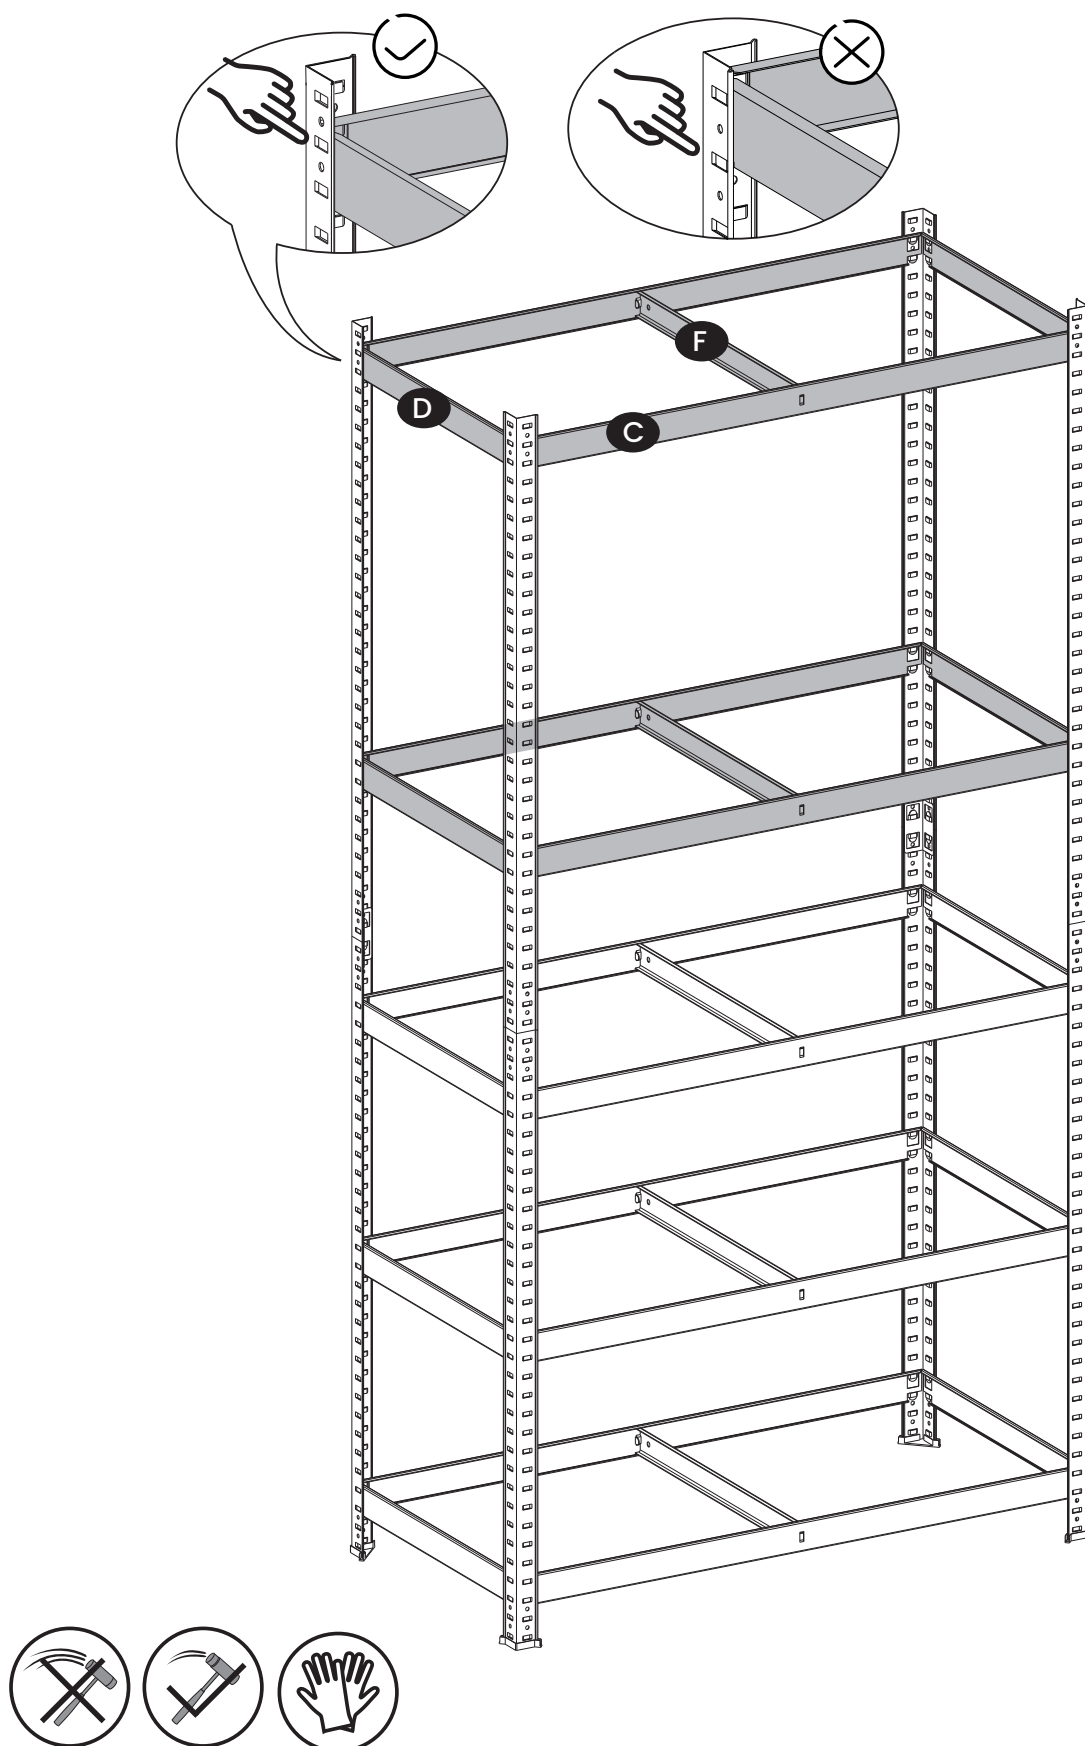

Bend the clip of part F to 90 degrees and insert the clip to the slot at the middle of part C, then bend the tip part of the clips to 90 degrees for a tight joint. This is to ensure that part F doesn't come off from part C.
