**Assembly Instructions**

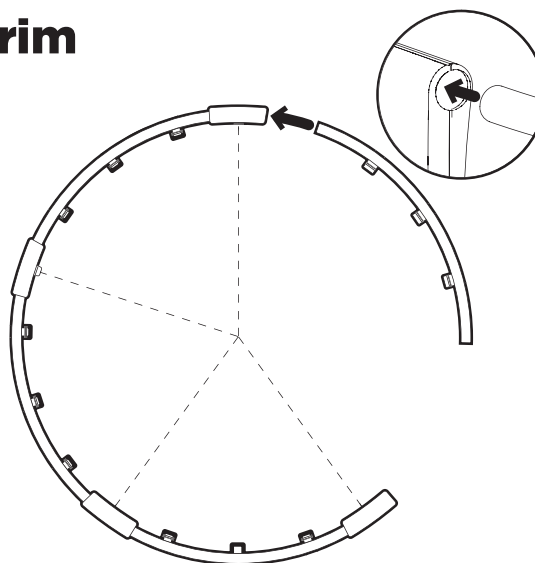

**Thank you for your purchase.**

Please follow the instructions below for correct assembly.

# Instruction

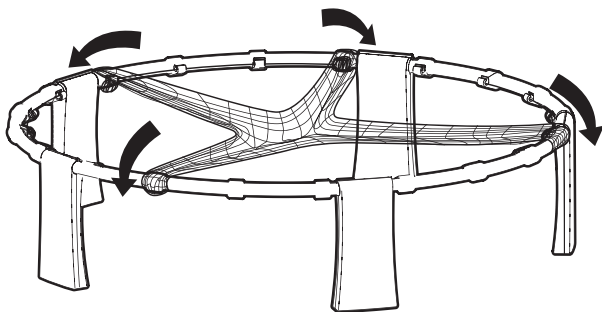

## 1. rim

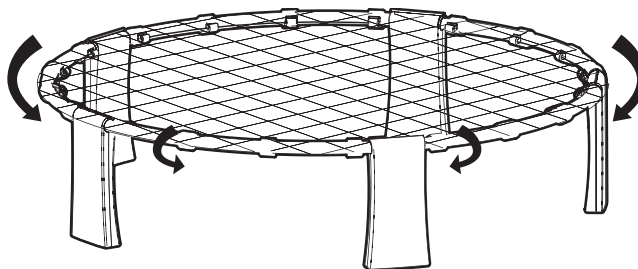

Insert rim segments into leg openings to make a 360° circle

## 2. net

Spread out the net and attach it to the hooks in 4 places, making an "X" shape with the net. Note that the net goes over the rim and attaches to the hook underneath.

## 3. done

Continue attaching the net to the remaining hooks until it looks like this. Your game set is complete and you are ready to mix it up.

## How do I play?

### Teams

Two teams of Two (four total). Each team starts on opposite sides of the net.

### Serving

Standing at least 5 feet from the net, Team One serves by tossing the ball in the air, and spiking it down on the net towards Team Two. Team Two has up to 3 hits (ie, 'sets' in volleyball) between them before they have to spike it back on the net. (Note: You do NOT have to use all 3 hits. This continues as a volley until one team can not return the ball. Use rally scoring to 21. To determine who serves first, teams should volley for serve.

**Important:** Once the ball is in play, there are no longer 'sides'. Players can run anywhere they want. Teams switch serving sides once a team reaches 11 points. The first team to 11 points usually has done most of the trash talking at this point.

### Scoring

1st team to 21 wins (must win by two). Use rally scoring. If your team served, and the other team can not return your shot, you've won a point.

# **Awesome!** **You did it!**
